

## Press Release

After 40 years of continuous service to the area, we are announcing that Hare Pipeline Construction is ceasing operations effective November 15, 2014. We appreciate the efforts of the many employees that made our company a success and we cherish the client relationships that have developed over the years.

While this is an end of an era, it also brings a new beginning. Substantially all of our assets are being acquired by MasTec North America, Inc. MasTec will also be hiring our employees and we will continue to operate the business at our current location in Apex, NC.

We look forward to continuing the long held principles of honesty, fairness, and quality while assisting in the expansion of MasTec's nationwide market of constructing electric, communications, and natural gas projects. So if you are in need of our services, please contact us at (919)362-0001.
